DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 5-7, 17, 20, and 21 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record issued to Leyendecker fails to teach or suggest an improved power ramping method in a transceiver comprising switching ON the power amplifier after an end of a prior packet reception period and prior to a start of a new packet transmission, ramping modulation signals supplied to the up-converter mixers upon initiation of a new packet transmission, and wherein the modulation signals are ramped by monotonically scaling a set of digital words representing the in-phase and quadrature-phase signals as cited in claim 1, 17, and 21. Leyendecker teaches the ramping up and down of power to the power amplifier at the start or finish of a transmission instead.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. **Any response to this action should be mailed to:**
